Tool Tracking System

GigaTrak TTS is designed to offer an easy-to-use lower cost alternative to other tool solutions in the market today. Reduce losses and save time tracking your tools with the GigaTrak Tool Tracking System!

Every contractor has valuable tools and equipment that you give out to employees and assign to job sites all of the time. The question that you need to ask yourself is "how much do I lose each year?" With the GigaTrakSM Tool Tracking Software (TTS) you can reduce losses by holding your employees and contractors responsible for the tools and equipment you give them. Everything is tracked through a simple scan of the tool's barcode. You can even schedule maintenance and track repairs! Best of all, you can locate any item and give employees reports of what they owe you. By managing your tool inventory, TTS will pay for itself in as little as 3 months!

Use TTS to Track Your Equipment

- Power and Hand Tools
- Welders and Industrial Equipment
- Precision Instruments
- Calibrated Equipment
- Radios, Cell Phones, etc.
- Design Drawings
- Consumables (gloves, etc.)
- You name it, TTS can track it!

TTS Users

- Contractors (Electrical, Industrial, etc.)
- Manufacturer's Tool Rooms
- Utilities and Municipalities
- Maintenance Groups
- Field Service & Repair Companies
- Government Agencies
- Development & Research Companies
- And many others!

Tool Tracking System

GigaTrakSM TTS helps you organize and track your tools and equipment inventory through a standardized check in/out process to an employee, contractor, location or job. A detailed history is kept on every transaction to ensure all the information you need to run your business is readily available.

Our TTS allows you to setup a master listing of tools so that new tools are added faster. You can also search on nearly any field including description, model and serial number. Keep track of lost and broken equipment. Transfer equipment between facilities. Schedule maintenance for any type of tool/equipment item and TTS alerts you when maintenance is coming due. Another key feature includes the ability to import tool data from other tool systems. All the features you typically need while keeping the system easy to implement and maintain!

GigaTrak TTS Offers

- Simple installation on any Windows XP and Vista computer system with typical memory and disk space.
- Systems bundles that have everything that you need in one box.
- Customization options available initially and at any time in the future to meet your specific requirements.
- Technical Support and Training options.
