

Tool Tracking System Cloud Edition

HOW MUCH DO YOU LOSE EVERY YEAR?

Every company has valuable tools, assets, equipment, and consumables given out to employees and assigned to different locations every day. Save time and money knowing where your equipment is with GigaTrak Tracking System. Our tracking systems make it easier to track and manage your assets, tools and inventory and is applicable within an office or out on a project. Improve inventory visibility with our barcode inventory system. We offer a comprehensive solution for businesses, educational institutions, government offices, and those in the construction, maintenance, and repair industries to monitor their stock of tools and equipment.

Our quick and easy-to-use software helps to increase accuracy and features a simple barcoding system to track assets, tools, inventory, equipment in storage or assigned to a location or person. Access via PC or mobile app. GigaTrak Tracking System will pay for itself in just a few months. It is available in three versions – Tool Tracking Basic, Pro, and Contractor Editions designed with the user in mind. Contact our sales team to discuss the version that best fits your business.

WHY CHOOSE GIGATRAK?

GigaTrak is a leader at providing barcode and RFID tracking solutions since 1996. We specialize in asset tracking, tool tracking, inbound package tracking, document tracking and guard tour systems that are created and supported in the United States.

We offer the most complete and flexible solutions that are available on both cloud-hosted and self-hosted platforms. Our solutions support Android and iOS devices that let you perform transactions on the go while managing assets at the point of productivity. GigaTrak offers industrial barcode scanners, PDA's, tablets, kiosks and industrial barcode labels to complete the solution.

Our goal is to help you reduce costs and increase productivity with user friendly solutions. We don't charge based on the number of assets so there is no additional cost to manage more assets as your company grows.
