*Simple to use*

*Upgradable*

*Start with a basic package and easily upgrade as your requirements change.*

Every organization has assets that are critical to their operation. With our GigaTrak<sup>SM</sup> Asset Tracking System (ATS), items can easily be assigned and tracked to either a location or person. Find your assets when you need them and avoid the expense of purchasing unnecessary replacements. GigaTrak<sup>SM</sup> Asset Tracking System – simple to learn, easy to operate, reliable tracking solution.

### **Use ATS to Track Your Assets:**

- Test and Lab Equipment
- Office and School Furniture
- Computer Systems
- Tools
- Transportation Equipment
- Artwork and Displays
- Documents
- Your valuable assets – Trak them!

### **People who use ATS:**

- Corporations
- Schools and Universities
- Medical Facilities
- Contractors
- Government Agencies
- Development & Research Labs
- Service & Repair Companies
- Utilities

# GigaTrak<sup>SM</sup> Asset Tracking Systems **ATS**

GigaTrak<sup>SM</sup> ATS organizes and tracks asset inventory using an efficient check in/out process. Assets can be assigned a class, type, facility, location, condition, account, funding source and more! Assets are checked out to employees or locations. Audit locations to ensure items are present. Our goal is to provide a highly reliable, easy-to-use, low cost tracking solution.

Four different GigaTrak<sup>SM</sup> editions provide solutions with features that best suit your needs. 1) ATS Starter Edition gets you going on a laptop with just a roll of labels and a USB scanner. 2) ATS Basic Edition gives you multiple user options with label printing, reservations, and more. 3) ATS Professional Edition adds the scheduling and tracking of maintenance as well as user defined fields. 4) For larger institutions, including schools and universities, look to our ATS School Edition to manage and import student, staff and faculty records.

## GigaTrak<sup>SM</sup> ATS Offers

- Simple installation on any Windows XP, Vista, and Windows 7 computer system with typical memory and disk space.
- Systems bundles have everything that you need in one box to get you started.
- GigaTrak<sup>SM</sup> ATS package runs on the Intermec CS40 Handheld Computer. The CS40 combines the performance and ruggedness into an economical form factor, offering a platform ideally suited to run GigaTrak<sup>SM</sup> ATS.
- Customization options are available both now and at any time in the future to meet your specific requirements.
- Technical Support and Training options.
