The following window appears. Select Save or Save As to download the \*.zip file to your computer. Remember the file location of where you save it. This will download your software application, so once it is downloaded, keep this zip file in a safe place.

| Windows Internet Explorer |  |  |  |  |
|---------------------------|--|--|--|--|
| Wha                       | at do you want to do with wintts.zip?          |  |  |  |
| Size:<br>From             | 19.8 MB<br>: files.gigatrak.com                |  |  |  |
| <b>÷</b>                  | Open<br>The file won't be saved automatically. |  |  |  |
| ÷                         | Save   |  |  |  |
| <b>→</b>                  | Save as  |  |  |  |
|                           | Cancel   |  |  |  |

Next, locate the \*.zip file on your computer (where you saved it) and Right Click on it. Select "Extract All" from the drop-down selection that appears.

A password will be required. The password will be noted below the original \*.zip file link:
