## GIGATRAK CLOUD CLIENT INSTALL GUIDE

---

### RUNNING AND ACCEPTING THE INSTALLATION

After you have downloaded the .ZIP with the latest version of the Gigatrak Cloud Client, right click the .ZIP and select Extract All. Then, run the CloudClientSetup.exe. Once the program opens, you will be prompted to accept the installation. Click Next to continue. Accept the EULA, then click on Next again.

---

### ENTERING VENDOR ID

Once you have agreed to the EULA for the GigaTrak Cloud Client, you will be prompted for your Vendor ID.

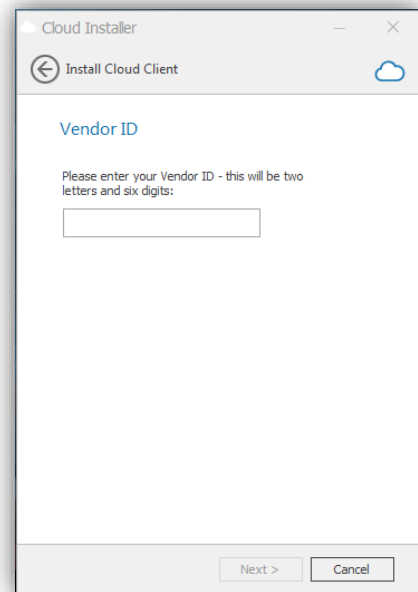

The Vendor ID is: **US342819**

After you have entered the Vendor ID, click on Next, then click on Next once more to begin installation.

Once the installation is complete, you will see a Success screen and the update process is complete. Once complete, click on Finish.

You will now see a GigaTrak Cloud application. You can now open the GigaTrak Cloud application and log into the program with the credentials in provided to you by GigaTrak.

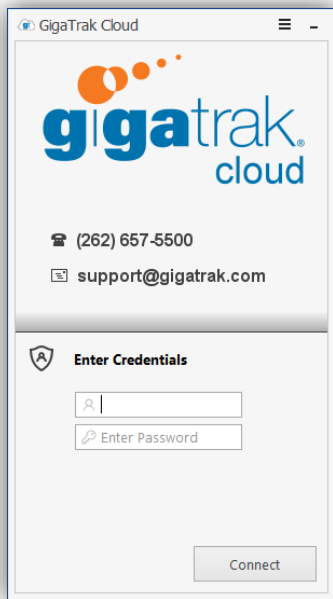

Follow the instructions below to log into the Cloud Client and launch your application.

---

## USER LOG IN

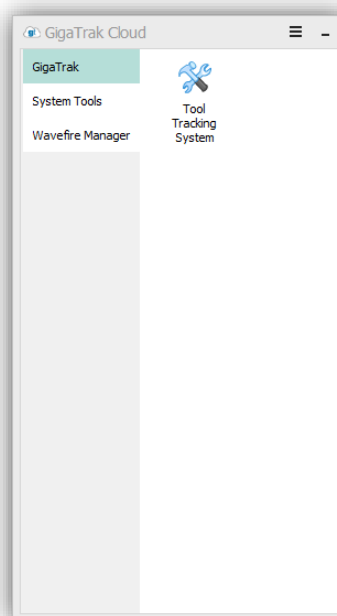

Enter the User Name and Password provided by GigaTrak, then click the 'Connect' button. After a moment, you should connect to the cloud application.

---

## RUNNING YOUR PROGRAM

From the applications window, you can select the GigaTrak Tab and double click on the icon to launch your application. You can also select System Tools to see the Cloud File Browser and add your documents and images as needed.

---

## EXITING THE GIGATRAK CLOUD CLIENT

When you've finished with your applications and you've saved all of your work, click on the menu button at the top of the GigaTrak Cloud Client window and click Circle in the bottom right corner of the menu to exit.
