

GigaTrak® Package Tracking System

The GigaTrak® Package Tracking System is an extremely easy-to-use solution for nearly any organization that needs to track the receipt, transfer, and delivery of registered mail and packages. With a low cost of ownership, your return-on-investment is just a matter of weeks away! Know when packages arrive and when they are delivered safely!

All large companies, schools, and member organizations receive volumes of registered mail and packages each day. It is easy to go online and enter a tracking number to find out when the package was accepted by your inbound personnel, but then how do you track it? Our GigaTrak® Package Tracking System uses the tracking barcode to receive, transfer, and deliver each item with minimal effort. Who has it, where is it, and when was it last handled! You can also create a "Container" such as a pallet or mail bag and assign multiple packages to each container. Then a single scan can transfer or deliver all of the packages contained within! Simple, effective, and quick to implement!

- Setup each Employee with ID, Name, Email, Phone, and Location Information
- Create storage and delivery Locations with a Location Import capability
- Print barcodes for Locations, Employees, and Containers
- Use a mobile handheld to collect receipts, transfers, deliveries, and signatures
- Download routing data to the host system and generate reports

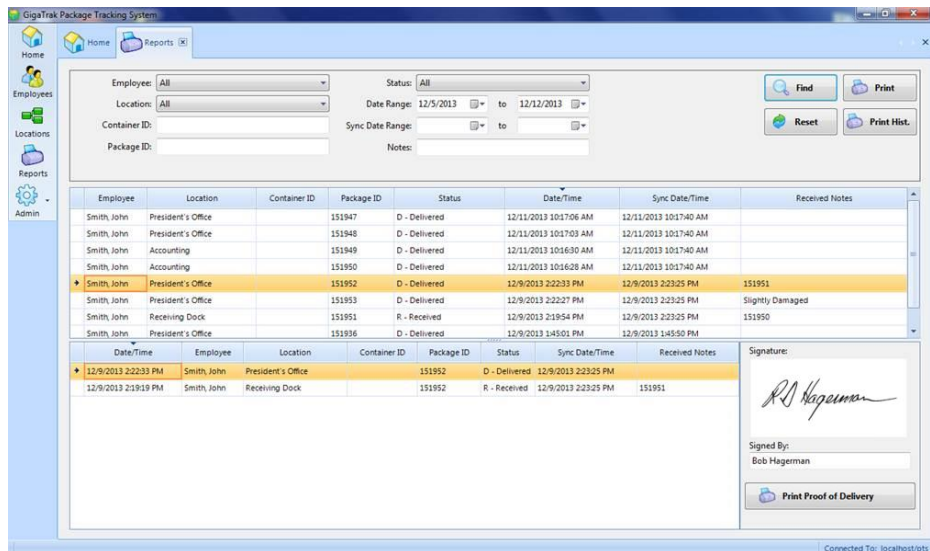

The GigaTrak® Package Tracking System can help you track your packages quickly and easily!

Call 833-444-2872 for more information!

GigaTrak® Package Tracking System

Do you need a simple solution to just track the routing of registered mail and packages throughout your organization? Our GigaTrak® Package Tracking System gets the job done with little training and effort. Receipt, Transfer, Containerize, and Deliver – this is all it takes to manage your packages easily and at a low cost!

The simple user interface allows for quick scanning and reporting. Each transaction is time and date stamped to ensure that reports are representative of when the actual scan was completed. Simple but effective!

What GigaTrak provides!

- GigaTrak can provide a complete turnkey solution. All software and hardware systems are available.
- Our Package Tracking System software is designed to run on Microsoft SQL Server – any industry standard.
- We recommend industrial Windows CE/Mobile™ handheld computer systems for durability and performance.
- Package Tracking System also prints barcode labels for package identification and accepts delivery signatures.

We Make it Easy!

- Simple installation on any Windows 7 or later computer system and network with either an Access or SQL Server database.
- Systems bundles have everything that you need including Software, hardware, labels, and more!
- Customization options available both now and at any time in the future to meet your specific requirements.
- Technical Support and Training options. We support everything you purchase from GigaTrak!
