GigaTrak® Tool Tracking System

Self-Hosted Solution

The GigaTrak® Tool Tracking System (TTS) is a powerful yet easy-to-use solution that streamlines the management of your tools and equipment. Reduce losses and save time locating and tracking items you need for your jobs!

Every contractor has valuable tools and equipment given out to employees and assigned to job sites every day. The question you need to ask yourself is "How much do I lose each year?" With the GigaTrak® Tool Tracking System (TTS) you can reduce losses by holding your employees and contractors responsible for the tools and equipment you give them. Everything is through a simple scan of the tool's barcode. You can even schedule maintenance and track repairs! Best of all, you can locate any item and give each of your employees a report of what they owe you. By managing your tool inventory, TTS will pay for itself in just a few months.

Use TTS to Track Your Equipment:
- Power and Hand Tools
- Welders and Industrial Equipment
- Precision Instruments
- Calibrated Equipment
- Radios, Cellular Phones, etc.
- Design Drawings
- Consumables (gloves, etc.)
- You name it – TTS can track it!

TTS Users Include:
- Contractors (Electrical, HVAC, etc.)
- Manufacturer Tool Rooms
- Utilities and Municipalities
- Maintenance Groups
- Field Service & Repair Companies
- Government Agencies
- Development & Research Companies
- And many others!

GigaTrak® Tool Tracking System

GigaTrak® TTS helps you organize and track your tools and equipment inventory through a standardized check out/in process to an employee, location, container, or job (Contractor Edition Only). A detailed history is kept on every transaction to ensure that all of the information you need to run your business is readily available.

Employee Assignment

Location Assignment

Tool History

Your Valuable Tools

Scheduled Maintenance

Tool Reservation

Our TTS allows you to setup a Master/Catalog listing of tools so that new tools can be added faster. You can also search on nearly any field including classification, type, description, model, and many others. You can keep track of lost and broken equipment while transferring between facilities. Equipment maintenance can also be managed with the Pro and Contractor Editions. TTS even has the ability to import data from other tool systems.
