

## GigaTrak® Asset, Tool, & Consumable Tracking System Self-Hosted and Cloud-Hosted Solutions

*The GigaTrak Tracking System is a powerful easy-to-use solution that streamlines management of your Tools, Assets, Equipment, and Inventory. Reduce time searching for lost or misplaced items and know where your assets are located at any given time. GigaTrak Android and iOS (Apple) mobile apps turn your cell phone into a scanner to perform transactions on the go!*

[Schedule Free Online Demo](#)

Every company has valuable tools, assets, equipment, and consumables given out to employees and assigned to different locations every day. The question you need to ask yourself is “How much do I lose each year?” With the GigaTrak® Tracking System you can reduce losses by holding individuals responsible for the assets and equipment you give them. Everything is through a simple scan of the item’s barcode. You can even schedule maintenance and track repairs! Best of all, you can locate any item and give each of your employees a report of what they owe you. Access the system and do transactions on either the PC or mobile app. By managing your inventory, GigaTrak will pay for itself in just a few months.
